How to Update CANoe Software on a RT Device (VN8900, VT6000, CANoe RT RT Rack / IPC)

English (Original) \( \begin{align\*} \text{last updated: 2023-04-12 (created: 2020-10-16)} \) \( \cdot \) \( \text{5837 Views} \)

# Update procedure

For CANoe ≥ 15 SP3

For CANoe ≥ 12.0 and ≤ 15 SP2

For CANoe ≥ 9.0 and ≤ 11.0

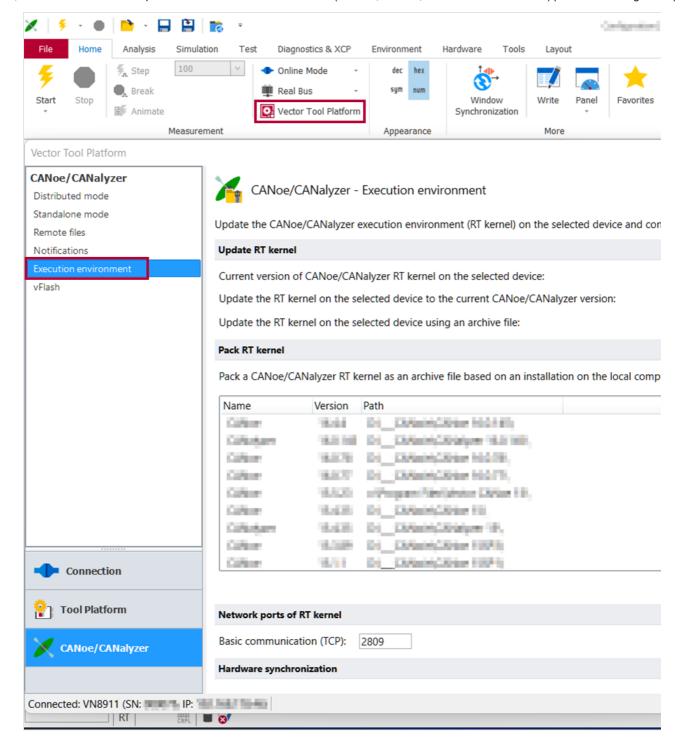

For CANoe ≤ 8.5

Please note that the network ports required for the update must not be blocked by a firewall or virus scanner. Further information can be found in the CANoe Online Help under **CANoe | CANoe RT |Overview | TCP/UDP Ports used by CANoe | Ports at RT Server Side**.

# For CANoe ≥ 15 SP3:

CANoe | Home | Vector Tool Platform | CANoe/CANalyzer | Execution environment | Update execution environment | Update...

7

You can choose between the variants 32-bit only, 64-bit only or 32-bit and 64-bit on supported VTP devices.

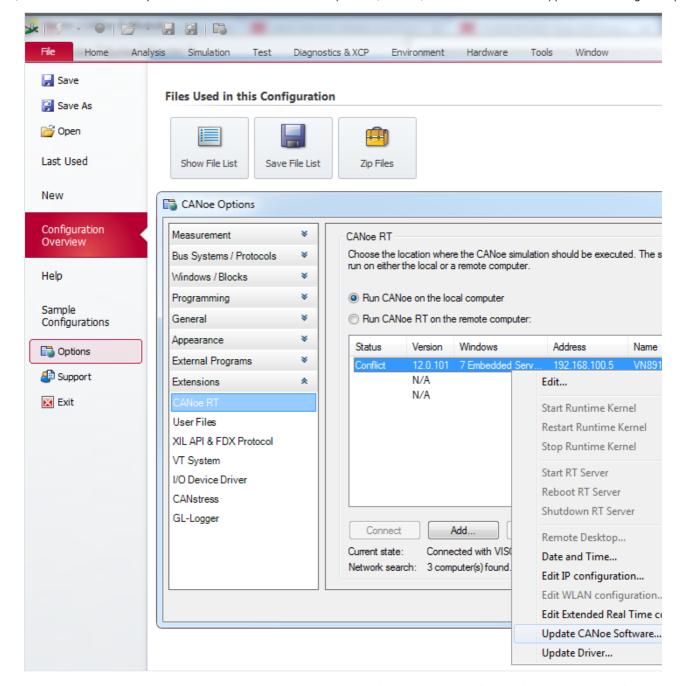

Note: VN8912, VN8912A do only support 32-bit

#### For CANoe $\geq$ 12.0 and $\leq$ 15 SP2:

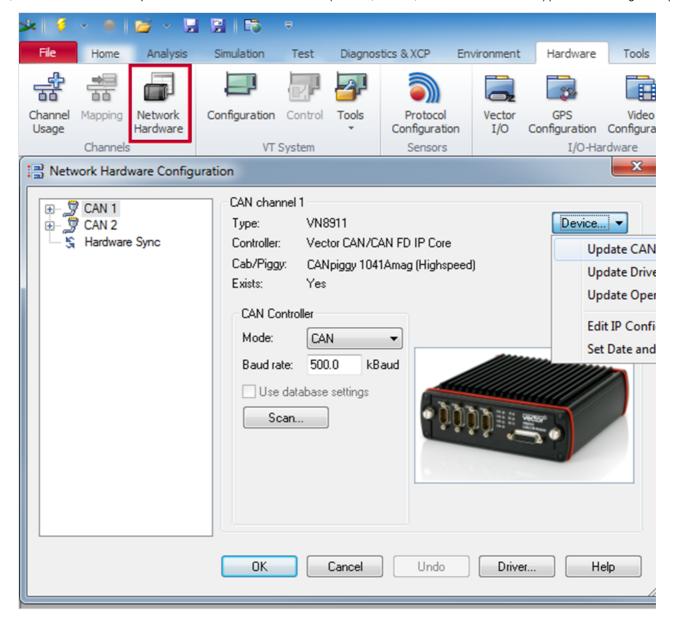

CANoe | Home | Vector Tool Platform | CANoe/CANalyzer | Execution Environment | Update execution environment | Update...

# For CANoe $\geq$ 9.0 and $\leq$ 11.0:

CANoe | File | Options | Extensions | CANoe RT | right click on Device | Update CANoe Software... (for VN8900 only if it is connected via IP)

For VN8900 if it is connected via USB: **CANoe | Hardware | Network Hardware | Network Hardware | Network Hardware | Option | Update CANoe Software** 

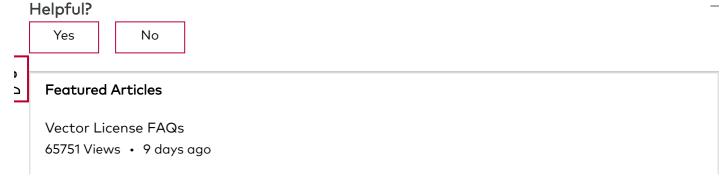

# For CANoe ≤ 8.5:

Via CANoe | Configuration | Options... | Extensions | CANoe RT | Right Click on Device | Update CANoe Software... (for VN8900 only if it is connected via IP).

For VN8900 if it is connected via USB: **CANoe | Configuration | Network Hardware | Network Hardware Config | Device | Update CANoe Software...**
